AN **ASCENT** WITH A VIEW

Introducing Ascent Camera

OVERVIEW

Now you can see who is at your gate or door with high-definition still photos. Whether taken automatically or when you require, Ascent Camera offers a new level of safety and convenience.

PHOTO CAPTURE

Ascent Camera can be configured to take a photo or series of photos whenever: the call button is pressed, the keypad is used, the gate status input is triggered, an on-demand photo request is made, and more. You determine what works for you.
PHOTO SIZE

You decide how big your photos need to be based on your own preference and bandwidth constraints. We offer three image sizes to suit your needs: small, medium, and large (HD).

PHOTO MANAGEMENT

Easily view all your captured photos through Summit Control. From here you will find all your photos sorted by date and time. Furthermore, you can capture additional photos on demand.

PHOTO PUSH NOTIFICATION

Know exactly who is at your gate or door before you grant access! Ascent Camera can send a photo push notification to up to 5 smartphones (dependent on plan) anytime the call button is pressed. Enjoy the luxury and convenience of getting a visual ID of the guest at your gate or door.
